Troubleshooting Your FalconNet Wireless Connection
Mac OS X Directions

Use the following instructions to set up your computer to access the FalconNet wireless networks.

Connect

1. Click Apple > System Preferences.
2. Click Network.
3. Click Wi-Fi > Advanced.
4. Under Preferred Networks, click the + symbol.
5. Enter the following information:
    a. Network Name: FalconNet
    b. Security: WPA2 Enterprise
    c. Mode: Automatic
    d. Your FalconNet username and password Then click OK.
6. Click OK.
7. Type your Mac administrator password and click OK.
8. At the Network screen, change the Network Name to FalconNet and click Apply. The connection will initiate.
9. Wi-Fi Connected and Status: Connected display to confirm the connection. To close the window, click the red close button.
